GEYSER
water filters

**WE MAKE
WATER
BETTER**

Geysер is a dynamically growing research and production holding with a decades-long history and tradition. The first Geysер filters were launched in 1986, the company stands at the origins of the formation of the water purification market.

Every year the company invests and conducts thousands of research and development activities, and its specialists develop new types of products – efficient and cost-effective solutions for the customers.

The company has Russian and international patents, certificates, conclusions of high quality products from international organizations, such as the Pasteur Institute.

THE MAIN PRODUCT RANGE OF THE COMPANY IS REPRESENTED IN THE FOLLOWING AREAS:

- Household filters
- Water purification systems for country houses
- Industrial water purification equipment
- Recycling water treatment systems for car washes

- Pasteur de Lille Institute (France)
- IFTS (France)
- Ferrara University (Italy)
- EUROFINS Laboratory (Sweden) ect...

**COMPACT MONOBLOCK FILTER
ECO MAX**

**ANTI-SCALE
PROTECTION
6 TIMES LONGER**

**FOR COMPLEX
TREATMENT
OF HARD WATER**

- Easy cartridge replacement without contact with contaminants
- The embodiment of the latest water treatment technologies and design solutions
- Savings on frequent replacement of softening cartridges

**EASY
CONNECTION
TO MIXER**

HEALTHY
Preservation of natural minerals

SAFE
Water purified from harmful contaminants

TASTY
Water without foreign tastes and odors

**COMPACT MONOBLOCK FILTER
ECO BIO**

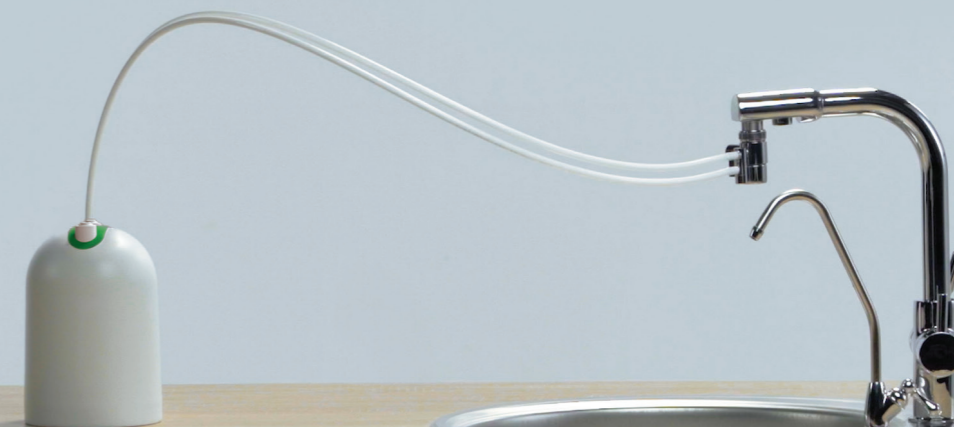

**100% PROTECTION FROM
BACTERIA AND VIRUSES**

**POTABLE WATER
WITHOUT BOILING**

**COMPLEX TREATMENT
OF SOFT WATER**

- Easy cartridge replacement without contact with contaminants
- The embodiment of the latest water treatment technologies and design solutions

**EASY
CONNECTION
TO MIXER**

HEALTHY
beneficial effect
on the body

SAFE
Water purified from harmful
contaminants

TASTY
Water without foreign
tastes and odors

CARTRIDGE RSFE

REMOVAL
OF DISSOLVED IRON

REMOVAL
OF MANGANESE

REDUCTION
OF HYDROGEN SULFIDE
CONCENTRATION

PURPOSE

- Pretreatment before undersink filter
- Protection of plumbing and household appliances
- Safe bathing

FOR PURIFICATION
OF WATER FROM WELLS
AND BOREHOLES

COMPATIBLE
WITH ANY
HOUSINGS

STANDARD
10BB, 20BB

CARTRIDGE ANTIBORON

EFFECTIVELY REMOVES BORON

Reducing the concentration to a level
of less than 0.5 ml / l

- High removal rate
- Works at any pH

Effective purification.
Multicomponent loading based
on sorption and boron-selective
ion-exchange materials

EASY KEYLESS REPLACEMENT

A clear click when fixing
will indicate the tightness
of the installation

FOR REVERSE OSMOSIS GEYSER PRESTIGE SMART ANTIBORON

COMPACT WATER FILTER GEYSER OPTIMA

IT OPTIMALLY
PURIFIES TAP WATER
FROM HARMFUL
IMPURITIES

- **FOR SOFT WATER**
Optimal purification and enrichment with healthy minerals - calcium, magnesium and potassium
- **FOR HARD WATER**
Optimum purification and long-term protection against scale formation

EASY
KEYLESS
REPLACEMENT

WE OFFER

- 1 Work with the manufacturer of products with our own research laboratory in the state
- 2 We can make any exclusive product that solves water problems in your country
- 3 Organization of delivery anywhere in the world
- 4 Marketing and information support at all stages of cooperation, training of employees
- 5 Unique scientific developments that has no world analogues will help you expand the range and attract new customers

BENEFITS FROM COOPERATION WITH GEYSER

- You could offer new unique products at a good price
- Increase the number of customers in your stores
- Increase the profitability of your sales
- To offer and use marketing promotion, developed together with our company
